LABELS needed are 2" x 4" 10 per sheet

SET PRINT AREA

(or only print pages 1-X)

Margin setup as below:

Most of these instructions and more notes are also shown on the right hand side of each page out of the print area. When entering target data I highly recommend saving the file to a flash drive and renaming it with the time in the file name (filename_0954am). This will make sure you have a copy of the data after targets are released and just incase there is a problem with the computer. Most of the pages and all important formulas are protected so that you can not change how the program functions. I also recommend saving often or turning auto-save on.

Competitor List	- enter Range, date and match info in top left corner. This info is passed onto the other pages so you only have to fill it in once on this page - enter starting and ending bench numbers - enter bench rotation. If you are not rotating benches enter 0. - enter names in Light Gun column - use button at top to copy names to HG column - If entering different shooter info for one bench now is the time to change one of the names - enter a Y if a FB member in the "LG FB" column and "HG FB" column - Enter a "Y" in the LG and HG column if they are entered in that class - Once the number of relays are determined you can use the random sort button in the top right. This will distribute the shooters across all relays in a random order. - Shooters can be moved around or added after the sort has been completed to accommodate special circumstances. (ie. using same equipment for 2 people) - NOTE - when moving people after the sort make sure to move/enter the FBLG/HG info also - "Start new Match" button will clear all shooter info and target data so that you can start entering a new match
Bench Assignment	- Enter target firing order in cells G6-J7 - print and post - see DataEntry notes below - Assign bench numbers and rotation (+2 after 2 targets, +2 when changing classes, etc) using Data Entry sheets, modify formulas for Relay 1 and the other relays will fill automatically (e.g., FunctionSum, select previous bench # and add 2)
Light Gun Equipment	- edit lists on right of page for quicker entry using the drop down menus - enter light gun equipment
Heavy Gun Equipment	- enter heavy gun equipment. Drop down menus are linked back to the Light Gun page
Light Gun	- enter target data - if you zoom in too much some boxes will show ## but will print correctly - save and print after each set of targets are entered - most of page is automatically filled in and calculated
Heavy Gun	- Same as light gun page
2-Gun Overall	- This page is automatically filled in and calculated.
printing	- forms are created long to accommodate all ranges/situations so you will have to set the print area to only print the needed realy information - For submitting results it is best to "Print to PDF" - To use the "Save AS PDF" button you must create a folder c:\600YardResults that is not read only
Target Labels	Labels are setup for 2" x 4" labels 10 per sheet you may have to change margin size for it to print correctly ** Frame # only works for no rotation, or shooting all LG then all HG using rotation. - any other rotation just ignore the frame# on the target labels
Factory Gun	This page is not linked to the competitor list so you must enter names manually Results must be printed seperately since most ranges do not use this page

See instructions on Comp List page; Data Entry pages have potential advantages:

easier to read on outside TV; may be fewer REIF errors or file corruption issues by not entering data directly on HG/LG pages, all cells are now protected on these pages; bench rotations can be customized quickly while avoiding shuffling of Data Entry Pages added (N) targets during scoring;

Score/X/Group transfers TO destination using links (HG/LG sheets are dependent), NAMES transfer FROM origin using links (DataEntry sheets are dependent)

For Bench rotation unprotect sheet, renumber the benches for Relay 1; set benches for Targets 1-4 etc using formulas as shown; the other relays will populate; Competitor #s will be aligned without shuffling of targets when scoring (e.g., can always start scoring with the paper target from Bench 1)

Print Data Entry sheets (Target 1 only) for posting of bench assignments; font size can be increased to 16 etc for better readability

"Save As" filename "junk" before unprotecting and changing font sizes

Paste links (Ctrl-Alt-V-) from/to DataEntry sheets in 3x14 blocks (score/x/group columns and all 14 rows for the relay); check for paste errors by inserting text in top left cell of each relay/target block (R1T1 etc) and checking location on destination page.

"backup now" button added by DMB

Updates to functionality 10/08/25 by Dave Barr

There are two new major functions added to the spreadsheet.

Spreadsheet backups

A button to the LG_DateEntry and HG_DataEntry sheets that allow a time stamped (hour and minute) copy of the spreadsheet to be copied to a backup sub-directory. Also, at startup a pop-up asks if you would like hourly reminders to do backups. Backups copies will be placed in a sub-directory "hourly" of the current directory. You also have the option to do a backup at anytime and as often as you like using the "backup now" buttons. Periodic saves to a flash drive is still prudent.

When you attempt to make the first backup if the sub-directory "hourly" does not exist you will be asked if it should be created. Answer "yes". If you answer "no" an error pop-up message may come up. Respond to it with "End".

If you need to recover from a major data corruption:

- Delete the corrupt spreadsheet
- Go to the sub-directory "hourly" and copy over the last saved copy of the spreadsheet to the directory of the original spreadsheet
- Rename the backup copy to the original name of the corrupted spreadsheet (remove the time stamp from the name).
- Open the restored spreadsheet.
- Any data entered after the last saved copy will need to be re-entered.

Spreadsheet corruption detection

The second new feature is enhanced data corruption detection. the spreadsheet constantly is monitoring the sheets "HEAVY GUN" and "LIGHT GUN" for any action that causes a serious error on the sheet.

If a serious error is detected:

- The spreadsheet will generate a pop-up message that the sheet is corrupt and suggest that the user "un-do" the last action.
- Un-do the last action. This will usually clear the corruption.
- If the corruption does not clear the pop-up will continue to be displayed at each change to the spreadsheet.
- If nothing seems to correct the corruption the user may have to resort to falling back to the last backup made as described above.

testing

testing

Sent to vapor trail for 2015 nationals

Modified for 4 target regular matches

added FB columns and revised calculations for rank only off FB=Y

added automatic FB points calculation for any number of shooters in different classes

fixed macros for sort functions

expanded to 150 rows to make sure it will work with any number of shooters

modified for 20 benches and sent to Harris for eval

added dynamic bench assignment and rotation

works for any starting and ending bench number, one program now works for all ranges

added X count

added second and third tie breakers

added macro to clear equipment lists

added macro to clear names and target data for new match

added dynamic ranges in sort function for different # of benches

Added factory gun page

Added print to PDF function

Added ability for one shooter to shoot LG and another in HG with same shooter ID and same bench

- This also disqualifies that bench from 2 gun page

Added FB points sheet for submission of points

- total points had to be removed from 2gun page to allow one shooter to shoot relay 1 bench1 LG (101) while

Fixed HG count for # of shooters that was linked to LG on comp page.

Found out macros do not work at Hunters Pointe on a Excel 2007 version. About 8-10 other computers have

Even without macros the program works for scoring. Just do not have random sort, or print to pdf button, or

added LG overall and HG overall points for SOY

Reconfigured 2 gun page for new 2gun overall calculation - uses 2gun score and group and not the LG and HG

added pages to print target stickers

Many changes not rev'ed.

14 benches, 4 relays. Includes previous mods to do on command backups and error detection/prevention.

Modified "TACTICAL Gun" competitor column to accommodate cut-n-paste.

Disabled "Cut" function. DEVELOPERS: Cut can be re-enabled for spreadsheet modification by executing the Macro "ThisWorkbook.EnableCut".

LABELS needed are 2" x 4" 10 per sheet

SET PRINT AREA

(or only print pages 1-X)

Margin setup as below:

Instructions for 600 yard FB program written by Mike McBride.

Most of these instructions and more notes are also shown on the right hand side of each page out of the print area. When entering target data I highly recommend saving the file to a flash drive and renaming it with the time in the file name (filename_0954am). This will make sure you have a copy of the data after targets are released and just incase there is a problem with the computer. Most of the pages and all important formulas are protected so that you can not change how the program functions. I also recommend saving often or turning auto-save on.

Competitor List	- enter Range, date and match info in top left corner. This info is passed onto the other pages so you only have to fill it in once on this page - enter starting and ending bench numbers - enter bench rotation. If you are not rotating benches enter 0. - enter names in Light Gun column - use button at top to copy names to HG column - If entering different shooter info for one bench now is the time to change one of the names - enter a Y if a FB member in the "LG FB" column and "HG FB" column - Enter a "Y" in the LG and HG column if they are entered in that class - Once the number of relays are determined you can use the random sort button in the top right. This will distribute the shooters across all relays in a random order. - Shooters can be moved around or added after the sort has been completed to accommodate special circumstances. (ie. using same equipment for 2 people) - NOTE - when moving people after the sort make sure to move/enter the FBLG/HG info also - "Start new Match" button will clear all shooter info and target data so that you can start entering a new match
Bench Assignment	- Enter target firing order in cells G6-J7 - print and post - see DataEntry notes below - Assign bench numbers and rotation (+2 after 2 targets, +2 when changing classes, etc) using Data Entry sheets, modify formulas for Relay 1 and the other relays will fill automatically (e.g., FunctionSum, select previous bench # and add 2)
Light Gun Equipment	- edit lists on right of page for quicker entry using the drop down menus - enter light gun equipment
Heavy Gun Equipment	- enter heavy gun equipment. Drop down menus are linked back to the Light Gun page
Light Gun	- enter target data - if you zoom in too much some boxes will show ## but will print correctly - save and print after each set of targets are entered - most of page is automatically filled in and calculated
Heavy Gun	- Same as light gun page
2-Gun Overall	- This page is automatically filled in and calculated.
printing	- forms are created long to accommodate all ranges/situations so you will have to set the print area to only print the needed realy information - For submitting results it is best to "Print to PDF" - To use the "Save AS PDF" button you must create a folder c:\600YardResults that is not read only
Target Labels	Labels are setup for 2" x 4" labels 10 per sheet you may have to change margin size for it to print correctly ** Frame # only works for no rotation, or shooting all LG then all HG using rotation. - any other rotation just ignore the frame# on the target labels
Factory Gun	This page is not linked to the competitor list so you must enter names manually Results must be printed seperately since most ranges do not use this page

See instructions on Comp List page; Data Entry pages have potential advantages:

easier to read on outside TV; may be fewer REIF errors or file corruption issues by not entering data directly on HG/LG pages, all cells are now protected on these pages; bench rotations can be customized quickly while avoiding shuffling of

Data Entry Pages added (N targets during scoring;

Score/X/Group transfers TO destination using links (HG/LG sheets are dependent), NAMES transfer FROM origin using links (DataEntry sheets are dependent)

For Bench rotation unprotect sheet, renumber the benches for Relay 1: set benches for Targets 1-4 etc using formulas as shown; the other relays will populate; Competitor #s will be aligned without shuffling of targets when scoring (e.g., can always start scoring with the paper target from Bench 1)

Print Data Entry sheets (Target 1 only) for posting of bench assignments; font size can be increased to 16 etc for better readability

"Save As" filename "junk" before unprotecting and changing font sizes

Paste links (Ctrl-Alt-V-) from/to DataEntry sheets in 3x14 blocks (score/x/group columns and all 14 rows for the relay); check for paste errors by inserting text in top left cell of each relay/target block (R1T1 etc) and checking location on destination page.

"backup now" button added by DMB

Updates to functionality 10/08/25 by Dave Barr

There are two new major functions added to the spreadsheet.

Spreadsheet backups

A button to the LG_DateEntry and HG_DataEntry sheets that allow a time stamped (hour and minute) copy of the spreadsheet to be copied to a backup sub-directory. Also, at startup a pop-up asks if you would like hourly reminders to do backups. Backups copies will be placed in a sub-directory "hourly" of the current directory. You also have the option to do a backup at anytime and as often as you like using the "backup now" buttons. Periodic saves to a flash drive is still prudent.

When you attempt to make the first backup if the sub-directory "hourly" does not exist you will be asked if it should be created. Answer "yes". If you answer "no" an error pop-up message may come up. Respond to it with "End".

If you need to recover from a major data corruption:

- Delete the corrupt spreadsheet
- Go to the sub-directory "hourly" and copy over the last saved copy of the spreadsheet to the directory of the original spreadsheet
- Rename the backup copy to the original name of the corrupted spreadsheet (remove the time stamp from the name).
- Open the restored spreadsheet.
- Any data entered after the last saved copy will need to be re-entered.

Spreadsheet corruption detection

The second new feature is enhanced data corruption detection. the spreadsheet constantly is monitoring the sheets "HEAVY GUN" and "LIGHT GUN" for any action that causes a serious error on the sheet.

If a serious error is detected:

- The spreadsheet will generate a pop-up message that the sheet is corrupt and suggest that the user "un-do" the last action.
- Un-do the last action. This will usually clear the corruption.
- If the corruption does not clear the pop-up will continue to be displayed at each change to the spreadsheet.
- If nothing seems to correct the corruption the user may have to resort to falling back to the last backup made as described above.

testing

testing

Sent to vapor trail for 2015 nationals

Modified for 4 target regular matches

added FB columns and revised calculations for rank only off FB=Y

added automatic FB points calculation for any number of shooters in different classes

fixed macros for sort functions

expanded to 150 rows to make sure it will work with any number of shooters

modified for 20 benches and sent to Harris for eval

added dynamic bench assignment and rotation

works for any starting and ending bench number, one program now works for all ranges

added X count

added second and third tie breakers

added macro to clear equipment lists

added macro to clear names and target data for new match

added dynamic ranges in sort function for different # of benches

Added factory gun page

Added print to PDF function

Added ability for one shooter to shoot LG and another in HG with same shooter ID and same bench

- This also disqualifies that bench from 2 gun page

Added FB points sheet for submission of points

- total points had to be removed from 2gun page to allow one shooter to shoot relay 1 bench1 LG (101) while

Fixed HG count for # of shooters that was linked to LG on comp page.

Found out macros do not work at Hunters Pointe on a Excel 2007 version. About 8-10 other computers have

Even without macros the program works for scoring. Just do not have random sort, or print to pdf button, or

added LG overall and HG overall points for SOY

Reconfigured 2 gun page for new 2gun overall calculation - uses 2gun score and group and not the LG and HG

added pages to print target stickers

Many changes not rev'ed.

14 benches, 4 relays. Includes previous mods to do on command backups and error detection/prevention.

Modified "TACTICAL Gun" competitor column to accommodate cut-n-paste.

Disabled "Cut" function. DEVELOPERS: Cut can be re-enabled for spreadsheet modification by executing the Macro "ThisWorkbook.EnableCut".

LABELS needed are 2" x 4" 10 per sheet

SET PRINT AREA

(or only print pages 1-X)

Margin setup as below:

Instructions for 600 yard FB program written by Mike McBride.

Most of these instructions and more notes are also shown on the right hand side of each page out of the print area. When entering target data I highly recommend saving the file to a flash drive and renaming it with the time in the file name (filename_0954am). This will make sure you have a copy of the data after targets are released and just incase there is a problem with the computer. Most of the pages and all important formulas are protected so that you can not change how the program functions. I also recommend saving often or turning auto-save on.

Competitor List	- enter Range, date and match info in top left corner. This info is passed onto the other pages so you only have to fill it in once on this page - enter starting and ending bench numbers - enter bench rotation. If you are not rotating benches enter 0. - enter names in Light Gun column - use button at top to copy names to HG column - If entering different shooter info for one bench now is the time to change one of the names - enter a Y if a FB member in the "LG FB" column and "HG FB" column - Enter a "Y" in the LG and HG column if they are entered in that class - Once the number of relays are determined you can use the random sort button in the top right. This will distribute the shooters across all relays in a random order. - Shooters can be moved around or added after the sort has been completed to accommodate special circumstances. (ie. using same equipment for 2 people) -NOTE - when moving people after the sort make sure to move/enter the FBLG/HG info also - "Start new Match" button will clear all shooter info and target data so that you can start entering a new match
Bench Assignment	- Enter target firing order in cells G6-J7 - print and post - see DataEntry notes below - Assign bench numbers and rotation (+2 after 2 targets, +2 when changing classes, etc) using Data Entry sheets, modify formulas for Relay 1 and the other relays will fill automatically (e.g., FunctionSum, select previous bench # and add 2)
Light Gun Equipment	- edit lists on right of page for quicker entry using the drop down menus - enter light gun equipment
Heavy Gun Equipment	- enter heavy gun equipment. Drop down menus are linked back to the Light Gun page
Light Gun	- enter target data - if you zoom in too much some boxes will show ## but will print correctly - save and print after each set of targets are entered - most of page is automatically filled in and calculated
Heavy Gun	- Same as light gun page
2-Gun Overall	- This page is automatically filled in and calculated.
printing	- forms are created long to accommodate all ranges/situations so you will have to set the print area to only print the needed realy information - For submitting results it is best to "Print to PDF" - To use the "Save AS PDF" button you must create a folder c:\600YardResults that is not read only
Target Labels	Labels are setup for 2" x 4" labels 10 per sheet you may have to change margin size for it to print correctly ** Frame # only works for no rotation, or shooting all LG then all HG using rotation. - any other rotation just ignore the frame# on the target labels
Factory Gun	This page is not linked to the competitor list so you must enter names manually Results must be printed seperately since most ranges do not use this page

See instructions on Comp List page; Data Entry pages have potential advantages:

easier to read on outside TV; may be fewer REIF errors or file corruption issues by not entering data directly on HG/LG pages, all cells are now protected on these pages; bench rotations can be customized quickly while avoiding shuffling of

Data Entry Pages added (N targets during scoring;

Score/X/Group transfers TO destination using links (HG/LG sheets are dependent), NAMES transfer FROM origin using links (DataEntry sheets are dependent)

For Bench rotation unprotect sheet, renumber the benches for Relay 1: set benches for Targets 1-4 etc using formulas as shown; the other relays will populate; Competitor #s will be aligned without shuffling of targets when scoring (e.g., can always start scoring with the paper target from Bench 1)

Print Data Entry sheets (Target 1 only) for posting of bench assignments; font size can be increased to 16 etc for better readability

"Save As" filename "junk" before unprotecting and changing font sizes

Paste links (Ctrl-Alt-V-) from/to DataEntry sheets in 3x14 blocks (score/x/group columns and all 14 rows for the relay); check for paste errors by inserting text in top left cell of each relay/target block (R1T1 etc) and checking location on destination page.

"backup now" button added by DMB

Updates to functionality 10/08/25 by Dave Barr

There are two new major functions added to the spreadsheet.

Spreadsheet backups

A button to the LG_DateEntry and HG_DataEntry sheets that allow a time stamped (hour and minute) copy of the spreadsheet to be copied to a backup sub-directory. Also, at startup a pop-up asks if you would like hourly reminders to do backups. Backups copies will be placed in a sub-directory "hourly" of the current directory. You also have the option to do a backup at anytime and as often as you like using the "backup now" buttons. Periodic saves to a flash drive is still prudent.

When you attempt to make the first backup if the sub-directory "hourly" does not exist you will be asked if it should be created. Answer "yes". If you answer "no" an error pop-up message may come up. Respond to it with "End".

If you need to recover from a major data corruption:

- Delete the corrupt spreadsheet
- Go to the sub-directory "hourly" and copy over the last saved copy of the spreadsheet to the directory of the original spreadsheet
- Rename the backup copy to the original name of the corrupted spreadsheet (remove the time stamp from the name).
- Open the restored spreadsheet.
- Any data entered after the last saved copy will need to be re-entered.

Spreadsheet corruption detection

The second new feature is enhanced data corruption detection. the spreadsheet constantly is monitoring the sheets "HEAVY GUN" and "LIGHT GUN" for any action that causes a serious error on the sheet.

If a serious error is detected:

- The spreadsheet will generate a pop-up message that the sheet is corrupt and suggest that the user "un-do" the last action.
- Un-do the last action. This will usually clear the corruption.
- If the corruption does not clear the pop-up will continue to be displayed at each change to the spreadsheet.
- If nothing seems to correct the corruption the user may have to resort to falling back to the last backup made as described above.

testing

testing

Sent to vapor trail for 2015 nationals

Modified for 4 target regular matches

added FB columns and revised calculations for rank only off FB=Y

added automatic FB points calculation for any number of shooters in different classes

fixed macros for sort functions

expanded to 150 rows to make sure it will work with any number of shooters

modified for 20 benches and sent to Harris for eval

added dynamic bench assignment and rotation

works for any starting and ending bench number, one program now works for all ranges

added X count

added second and third tie breakers

added macro to clear equipment lists

added macro to clear names and target data for new match

added dynamic ranges in sort function for different # of benches

Added factory gun page

Added print to PDF function

Added ability for one shooter to shoot LG and another in HG with same shooter ID and same bench

- This also disqualifies that bench from 2 gun page

Added FB points sheet for submission of points

- total points had to be removed from 2gun page to allow one shooter to shoot relay 1 bench1 LG (101) while

Fixed HG count for # of shooters that was linked to LG on comp page.

Found out macros do not work at Hunters Pointe on a Excel 2007 version. About 8-10 other computers have

Even without macros the program works for scoring. Just do not have random sort, or print to pdf button, or

added LG overall and HG overall points for SOY

Reconfigured 2 gun page for new 2gun overall calculation - uses 2gun score and group and not the LG and HG

added pages to print target stickers

Many changes not rev'ed.

14 benches, 4 relays. Includes previous mods to do on command backups and error detection/prevention.

Modified "TACTICAL Gun" competitor column to accommodate cut-n-paste.

Disabled "Cut" function. DEVELOPERS: Cut can be re-enabled for spreadsheet modification by executing the Macro "ThisWorkbook.EnableCut".

LABELS needed are 2" x 4" 10 per sheet

SET PRINT AREA

(or only print pages 1-X)

Margin setup as below:

Instructions for 600 yard FB program written by Mike McBride.

Most of these instructions and more notes are also shown on the right hand side of each page out of the print area. When entering target data I highly recommend saving the file to a flash drive and renaming it with the time in the file name (filename_0954am). This will make sure you have a copy of the data after targets are released and just incase there is a problem with the computer. Most of the pages and all important formulas are protected so that you can not change how the program functions. I also recommend saving often or turning auto-save on.

Competitor List	- enter Range, date and match info in top left corner. This info is passed onto the other pages so you only have to fill it in once on this page - enter starting and ending bench numbers - enter bench rotation. If you are not rotating benches enter 0. - enter names in Light Gun column - use button at top to copy names to HG column - If entering different shooter info for one bench now is the time to change one of the names - enter a Y if a FB member in the "LG FB" column and "HG FB" column - Enter a "Y" in the LG and HG column if they are entered in that class - Once the number of relays are determined you can use the random sort button in the top right. This will distribute the shooters across all relays in a random order. - Shooters can be moved around or added after the sort has been completed to accommodate special circumstances. (ie. using same equipment for 2 people) - NOTE - when moving people after the sort make sure to move/enter the FBLG/HG info also - "Start new Match" button will clear all shooter info and target data so that you can start entering a new match
Bench Assignment	- Enter target firing order in cells G6-J7 - print and post - see DataEntry notes below - Assign bench numbers and rotation (+2 after 2 targets, +2 when changing classes, etc) using Data Entry sheets, modify formulas for Relay 1 and the other relays will fill automatically (e.g., FunctionSum, select previous bench # and add 2)
Light Gun Equipment	- edit lists on right of page for quicker entry using the drop down menus - enter light gun equipment
Heavy Gun Equipment	- enter heavy gun equipment. Drop down menus are linked back to the Light Gun page
Light Gun	- enter target data - if you zoom in too much some boxes will show ## but will print correctly - save and print after each set of targets are entered - most of page is automatically filled in and calculated
Heavy Gun	- Same as light gun page
2-Gun Overall	- This page is automatically filled in and calculated.
printing	- forms are created long to accommodate all ranges/situations so you will have to set the print area to only print the needed realy information - For submitting results it is best to "Print to PDF" - To use the "Save AS PDF" button you must create a folder c:\600YardResults that is not read only
Target Labels	Labels are setup for 2" x 4" labels 10 per sheet you may have to change margin size for it to print correctly ** Frame # only works for no rotation, or shooting all LG then all HG using rotation. - any other rotation just ignore the frame# on the target labels
Factory Gun	This page is not linked to the competitor list so you must enter names manually Results must be printed seperately since most ranges do not use this page

See instructions on Comp List page; Data Entry pages have potential advantages:

easier to read on outside TV; may be fewer REIF# errors or file corruption issues by not entering data directly on HG/LG pages, all cells are now protected on these pages; bench rotations can be customized quickly while avoiding shuffling of

Data Entry Pages added (N targets during scoring;

Score/X/Group transfers TO destination using links (HG/LG sheets are dependent), NAMES transfer FROM origin using links (DataEntry sheets are dependent)

For Bench rotation unprotect sheet, renumber the benches for Relay 1: set benches for Targets 1-4 etc using formulas as shown; the other relays will populate; Competitor #s will be aligned without shuffling of targets when scoring (e.g., can always start scoring with the paper target from Bench 1)

Print Data Entry sheets (Target 1 only) for posting of bench assignments; font size can be increased to 16 etc for better readability

"Save As" filename "junk" before unprotecting and changing font sizes

Paste links (Ctrl-Alt-V-) from/to DataEntry sheets in 3x14 blocks (score/x/group columns and all 14 rows for the relay); check for paste errors by inserting text in top left cell of each relay/target block (R1T1 etc) and checking location on destination page.

"backup now" button added by DMB

Updates to functionality 10/08/25 by Dave Barr

There are two new major functions added to the spreadsheet.

Spreadsheet backups

A button to the LG_DateEntry and HG_DataEntry sheets that allow a time stamped (hour and minute) copy of the spreadsheet to be copied to a backup sub-directory. Also, at startup a pop-up asks if you would like hourly reminders to do backups. Backups copies will be placed in a sub-directory "hourly" of the current directory. You also have the option to do a backup at anytime and as often as you like using the "backup now" buttons. Periodic saves to a flash drive is still prudent.

When you attempt to make the first backup if the sub-directory "hourly" does not exist you will be asked if it should be created. Answer "yes". If you answer "no" an error pop-up message may come up. Respond to it with "End".

If you need to recover from a major data corruption:

- Delete the corrupt spreadsheet
- Go to the sub-directory "hourly" and copy over the last saved copy of the spreadsheet to the directory of the original spreadsheet
- Rename the backup copy to the original name of the corrupted spreadsheet (remove the time stamp from the name).
- Open the restored spreadsheet.
- Any data entered after the last saved copy will need to be re-entered.

Spreadsheet corruption detection

The second new feature is enhanced data corruption detection. the spreadsheet constantly is monitoring the sheets "HEAVY GUN" and "LIGHT GUN" for any action that causes a serious error on the sheet.

If a serious error is detected:

- The spreadsheet will generate a pop-up message that the sheet is corrupt and suggest that the user "un-do" the last action.
- Un-do the last action. This will usually clear the corruption.
- If the corruption does not clear the pop-up will continue to be displayed at each change to the spreadsheet.
- If nothing seems to correct the corruption the user may have to resort to falling back to the last backup made as described above.

testing

testing

Sent to vapor trail for 2015 nationals

Modified for 4 target regular matches

added FB columns and revised calculations for rank only off FB=Y

added automatic FB points calculation for any number of shooters in different classes

fixed macros for sort functions

expanded to 150 rows to make sure it will work with any number of shooters

modified for 20 benches and sent to Harris for eval

added dynamic bench assignment and rotation

works for any starting and ending bench number, one program now works for all ranges

added X count

added second and third tie breakers

added macro to clear equipment lists

added macro to clear names and target data for new match

added dynamic ranges in sort function for different # of benches

Added factory gun page

Added print to PDF function

Added ability for one shooter to shoot LG and another in HG with same shooter ID and same bench

- This also disqualifies that bench from 2 gun page

Added FB points sheet for submission of points

- total points had to be removed from 2gun page to allow one shooter to shoot relay 1 bench1 LG (101) while

Fixed HG count for # of shooters that was linked to LG on comp page.

Found out macros do not work at Hunters Pointe on a Excel 2007 version. About 8-10 other computers have

Even without macros the program works for scoring. Just do not have random sort, or print to pdf button, or

added LG overall and HG overall points for SOY

Reconfigured 2 gun page for new 2gun overall calculation - uses 2gun score and group and not the LG and HG

added pages to print target stickers

Many changes not rev'ed.

14 benches, 4 relays. Includes previous mods to do on command backups and error detection/prevention.

Modified "TACTICAL Gun" competitor column to accommodate cut-n-paste.

Disabled "Cut" function. DEVELOPERS: Cut can be re-enabled for spreadsheet modification by executing the Macro "ThisWorkbook.EnableCut".
